

Anton Nikiforov

Python Developer | Backend | System Analysis

Moscow · +7 (920) 568-0667 · Telegram: @c_lma · nikiforov.anton.pv201@gmail.com · github.com/TonyGoalsMan1

EXPERIENCE

Sberbank - Automated Trading System

Nov 2024 - Jul 2025

Developer - Application Support & System Analysis

- Built Python utilities and scripts for searching, validating and analyzing information in large data sets.
- Automated manual search and verification workflows with Python.
- Analyzed business processes and requirements; assessed the impact of changes on system behavior.
- Supported an internal corporate system and implemented changes driven by legislation and regulations.
- Worked with more than 300,000 files and supported automated data refreshes running 30 times per day.
- Optimized SQL queries and complex JOINS, making selected critical operations about 3-5x faster.
- Used Linux, Git and SQL; handled tasks end-to-end from analysis through implementation, testing and support.

Technologies of Reliability

Aug 2021 - Jul 2024

Software Developer (Python / Web)

- Migrated and reworked existing functionality from ASP.NET and PHP to Python.
- Developed server-side logic, web modules and API integrations.
- Created Python scripts and helper tools for repetitive-process automation.
- Worked with PostgreSQL and SQLite, database design and SQL optimization.
- Supported and refactored legacy code and moved existing business logic to modern technologies.

TECHNICAL SKILLS

Python: FastAPI, Flask, Django, asyncio, pytest

Backend: REST API, server-side logic, integrations

Databases: PostgreSQL, SQLite, MongoDB, SQL, query optimization

Data / ML: Pandas, scikit-learn, NLP, LLM, data analysis

Tools: Linux, Docker, Git, CI/CD, logging, monitoring

Web: HTML, CSS, JavaScript, PHP

Automation: small ETL processes; Python scripts for data analysis, reports and logs

PROJECTS

- **ChatBot Study:** Telegram bot for learning programming with AI: task generation and checking, personalized learning and feedback. Python, FastAPI, PostgreSQL, OpenAI API, SQLAlchemy.
- **AI Telegram Planner:** Telegram bot for task planning, reminders and goal tracking; API, data storage, NLP.
- **Flight Alert Bot:** Telegram bot for monitoring flight prices and sending automatic notifications when prices fall. Python, asyncio, REST API, Telegram Bot API.

EDUCATION

- Lomonosov Moscow State University: CMC, Big Data - Master's program, 2027.
- Belgorod State Technological University named after V. G. Shukhov - Software Engineering, 2025.

ADDITIONAL

- English: C1 Advanced. Russian: native.
- Teamwork: task distribution, helping colleagues, code review.
